

# 2016 CISL Symposium

Patient Safety: Is Simulation the Answer?

**Wednesday April 20th**

Keynote address & workshop by Jeffrey B. Cooper, PhD

## The Fruits of Collaboration: Patient Safety, Simulation, Teachers, Relationships

Effective interpersonal relationships build the foundation for successful collaborations. Dr. Jeffrey B. Cooper will share personal reflections on a fruitful 44 years in patient safety and the generative 25-year alliance between simulation faculty at Stanford and Harvard Medical Schools. He will describe the critical role of teachers and faculty development in using simulation to address patient safety challenges and particularly for speaking up about patient safety concerns and the giving and receiving of feedback.

Panel discussion

Ignite talks

Workshop

Join us in the afternoon for a 90-min interactive workshop, where we will explore the giving and receiving of feedback for personal improvement, based on 'Thanks for the Feedback' and our collective experiences. Read the book by Stone and Hene. Be prepared to challenge yourself.
